Site Features

- 1 Entrance/Manor House - With beds featuring alpine plants, the heath family, southeast U.S. natives and ferns, visitors can get a taste of the variety of plants found throughout the garden.
- 2 Winter Interest - Shrubs and herbaceous perennials provide flowers, fruits and texture to brighten the cold, dark days of winter.
- 3 Xeric - Plants adapted to hot, dry conditions demonstrate a contrast to those common in our mild, wet climate.
- 4 Moist Coniferous Woods - A stroll through this section of forest typical of western Oregon has native spring ephemerals such as *Erythronium* and *Synthyris*.
- 5 Berberidaceae - Commonly known as the barberry family, this section displays the beautiful flowers, leaves, and variety of forms within one family of plants.
- 6 Physic Garden - Shade tolerant plants with medicinal properties are grown in honor of the herb bed established by John Leach.
- 7 Woodland Lilies - The prevalent shade of the conifer forest is ideal for many species such as *Polygonatum*, *Lilium*, and *Smilacina*.
- 8 Nursery/Compost Display - Numerous beds and containers feature plants from alpine and high desert settings. Fuchsias and Pacific northwest shrubs surround Various compost units for visitors to enjoy.
- 9 Historic Leach Collection - Wander the trails to view features such as camellias, southeastern U.S. natives, and trilliums.
- 10 Rock Garden - This sunny slope and its plants emulate alpine and dry regions of western North America.
- 11 East Terrace - The most formal area of the Garden has a stone centerpiece, brick patio, and arbors. A twisted hawthorn tree overlooks the terrace, while hydrangeas, dogwoods, and climbing vines add interest.
- 12 Riparian Zone - Johnson Creek provides a dynamic accompaniment to an extensive fern collection, native shrubs, and stately trees.
- 13 Stone Cabin - This quaint and sturdy structure built in 1931 provided a summer retreat for the Leaches and their friends. Redwoods grow nearby.
- 14 Dry Coniferous Woods - Features include plants of Curry County, OR and hundreds of trillium blooms in spring.
